

Congress:

Pass Small Business Health Plans...

America is Waiting

Red State or Blue State, Republican or Democrat, 89% of Americans Consistently Agree on the Idea of Small Business Health Plans*

Across the country — and across party lines — an overwhelming majority of Americans are counting on Congress to give small businesses and the self-employed greater access to affordable health plans. It's not politics, it's a fact of life: Two-thirds of Americans say they worry "a great deal" about the availability and affordability of healthcare.**

Such a strong majority demands the attention of Congress to do the right thing and give small businesses access to more affordable health care.

It's the Right Thing to do Right Now.
