NAR's Analysis of Economic Indicators

NAR's analysis of economic indicators provides its members with the tools to interpret economic trends and apply that knowledge to their business. NAR Research analyzes the most important economic indicators that influence real estate markets. In addition to NAR's own existing-home sales and Pending Home Sales Index, other indicators such as new-home sales, housing starts, mortgage interest rates, employment, Gross Domestic Product and the Consumer Price Index are monitored by the Research staff. All these indicators are used by NAR analysts to prepare the Association's forecasts.

To access, go to: <http://realtor.org/research> and look for Housing Indicators.

NAR's news releases are posted at <http://realtor.org> in the Web site's News Media section.
